DETAILED ACTION

Claim Objections

1. Claims 22 and 23 are objected to because of the following informalities: Claims 22 and 23 recite, "wherein the inflatable object in a balloon" which is unclear. The office believes this is an inadvertent word processing error and believes it should read "wherein the inflatable object is a balloon". Appropriate correction is required.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: Figure 3 reference 70 is not described in the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11, 21, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Margolis (US Patent 5,108,338).

Regarding Claim 11, Margolis discloses a sound module comprising: a speaker (16); an amplification device (26 and 24) arranged to space the speaker from an inflatable object (30), the amplification device being attached to the inflatable object, the inflatable object having an interior bounded by walls (interior between 26 and 24); and, a circuit (14) configured to generate audio signals and being electrically coupled to the speaker, the speaker being configured and arranged to convert the audio signals into sound that resonates off the walls within the interior of the inflatable object.

Regarding Claim 21, Margolis discloses the amplification device has a hole (32) which is arranged the speaker.

Regarding Claim 23, Margolis discloses the inflatable object is a balloon (30).

Allowable Subject Matter

5. Claims 1, 3-9, and 14-20 are allowed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hoshi (US Patent 4,823,907) and Blackman (US Patent 6,482,065) disclose speaker and amplification device with an inflatable object.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Justin Michalski whose telephone number is (571)272-7524. The examiner can normally be reached on M-F 7-3:30.
